

# Clover Wildland Fire Use June 17, 2008 South Sierra Wilderness

Olancha Peak 12,123 feet elevation

Honeybee WFU

View looking north along Crag Peak ridge with Beck Meadow on the left, west, (about 8,000 feet elevation). The fire is slowly burning south through Jeffery Pine needle litter at a rate of about 100 acres per day. The burnt area to the left, west, is the eastern portion of the 2006 Broder / Beck WFU that burned 3,500 over a one-month period.

Deer Mountain 9,400 feet elevation

Sierra Nevada Crest

Crag Peak

View looking southeast across Beck Meadow showing the Crag Creek saddle upper, middle, (Crag Creek drains south from the saddle to the South Fork Kern River). Lower picture area is the 2006 Broder / Beck WFU.

View looking southeast from over Monache Meadows, Inyo National Forest, with the South Fork of the Kern River in foreground.

June 8, 2008, 1930 hours, view looking northeast across northern portion of Crag Peak ridge during the fire's run out of Crag Creek towards the north.
